Profeena Technology | Diploma in Web designing | 2024

Profeena Technology | Diploma in Programming | 2024

PROJECT

Budget Trakeing API

Tools used - HTML5, CSS3, JavaScript, Bootstrap

A responsive web application for managing daily expenses with login authentication using OOP concepts in JavaScript. Utilizes localStorage for data persistence and fetches motivational quotes from a public API to enhance user experience. Built with HTML, CSS, Bootstrap, and JavaScript.

Watch Website

Tools used - HTML5, CSS3, Bootstrap

A sleek and responsive e-commerce-style website for showcasing watches, built using HTML, CSS, and Bootstrap. Features a clean layout, product cards, and smooth navigation, optimized for all screen sizes to deliver a seamless user experience.

Nykaa Clone Website

Tools used - HTML5, CSS3

A static front-end replica of the Nykaa website, built using HTML and CSS. Focuses on accurately recreating the layout and design of the original site, highlighting skills in structured markup and clean styling.
